APPSDC conducted a workshop in CE Department named as “**AUTO CAD ADD ON COURSE**” by trainers N. Nagasai, B. Mallikarjuna Reddy. This was scheduled on 26th November to 1st December 2019. The agenda of program was to prepare blueprints and plans for architecture, construction, and manufacturing projects. AutoCAD offers a lot of benefits. By learning this software, a student will save time and money, it'll also decrease drafting error, produce better quality renderings and be able to offer a complete solution involved in the project. It truly has made the work a lot easier. The students are able to make work simpler and easier with least chances of error. They showed a good response during the session.

Respected Sir/Madam,

Sub: B.Tech (IT) Students Industry Exposure visit - Request - Reg

Andhra Loyola Institute of Engineering and Technology is a sister institution of the reputed Andhra Loyola College, Vijayawada, as an affiliated College to Jawaharlal Nehru Technological University, Kakinada. Established in 2008, the college works with the motto "A fire that kindles other fires." The college imparts Value Centred Education, through technology with a human face. ALIET provides holistic education, much like its sister institution the Andhra Loyola College, Vijayawada (Which was founded in 1953). We conduct academic programmes of high intensity with a remarkable impact that keeps the young minds interested and excited to learn.

As you are kindly aware, educational tours create not only awareness but also build self-confidence and facilitate the young minds to re-evaluate their understanding. We do conduct educational tours to expose the budding engineers to the dynamic world of technology. In this context, we request your kind self to provide us an opportunity for our students (3 Batches with a batch size - 50) along with the Faculty to visit your esteemed organization, Efftronics Systems Pvt Ltd, during the month of September 2018, during the afternoon hours, on any three convenient dates of your choice for three batches.

Thanking you,

- All metals have a tendency to corrode, with some corroding more easily than others.
- Metals are extracted from ores (oxides, sulfides and others).
- Production of these metals from their ores requires energy (heating and melting).
- Certain environments offer opportunities for these metals to recombine and revert to their lower energy states.
- Thus, corrosion can be described as "extractive metal".

Theorem

Every complex valued strong b-metric space has a completion which is unique up to bijective isometry.

Proof

Let X and X^* be as in Lemma (2.5) and Lemma (2.6). Define a mapping $f : X \rightarrow X^*$ as $f(x) = (x, x, x, \dots) \in (x^*) \subset X^*$ then f is isometry because,

$$d^*(f(x), f(y)) = d^*(x^*, y^*) = \lim_{n \rightarrow \infty} d(x_n, y_n) = d(x, y).$$

(since $x_n = (x, x, x, \dots) \in x^*, y_n = (y, y, y, \dots) \in y^*$).

Clearly, f is injective so $X \approx f(X)$ next we show that $f(X)$ is dense in X^* .

If $x^* \in X^*$ and $(x_n) \in X^*$ then for each $0 < c \in \mathbb{C}$, there exists $N \in \mathbb{N}$ such that for all $n > N$, $d(x_n, x_N) < c$, let $(x_N, x_N, x_N, \dots) \in X_0^* \subset f(X)$.

Passcode: 466720

Participants: III Year Mechanical Engineering students.

Description about the Orientation Program:

An interactive webinar on the topic "**Opportunities For Mechanical Engineers In Heating, Ventilation And Air Conditioning (HVAC) Industry**" was organized by Department of Mechanical Engineering Session on 22/6/2020 by Mr. Asif, Entrepreneur of Prinston Smart Engineers. The target audience are III Year Mechanical engineering students

Heating, ventilation, and air conditioning (HVAC) is the technology of indoor and vehicular environmental comfort. Its goal is to provide thermal comfort and acceptable indoor air quality. HVAC system design is a sub-discipline of mechanical engineering, based on the principles of thermodynamics, fluid mechanics and heat transfer.

This lecture was very helpful to students who understood the importance of HVAC in residential structures such as family homes, apartment buildings, hotels, medium to large industrial and office buildings such as skyscrapers and hospitals etc...

Opportunities in Mechanical Engineers in Mechanical, electrical and plumbing (MEP) Industry

Title: Opportunities in Mechanical Engineers in Mechanical, electrical and plumbing (MEP) Industry

Participants: I st Year Mechanical engineering students.

Description about the Orientation Program:

An Interactive orientation program on the topic **Opportunities in Mechanical Engineers in Mechanical, electrical and plumbing (MEP) Industry** was organized on 23/6/2020 by Department of Mechanical Engineering Session was taken by Mr. Asif, Entrepreneur of Prinston Smart Engineers. The target audience are IstYear Mechanical engineering students.

Mechanical, electrical and plumbing (MEP) refers to these aspects of building design and construction. In commercial buildings, these elements are often designed by a specialized engineering firm. MEP's design is important for planning, decision-making, accurate documentation, performance and cost-estimation, construction, and operating/maintaining the resulting facilities

This lecture was very helpful to students who understood the importance of **MEP, specifically** the in-depth design and selection of MEP systems, as opposed to a tradesperson who simply installs equipment. For example, a plumber may select and install a commercial hot water system based on common practice and regulatory codes. A team of MEP engineers will research the best design according to the principles of engineering, and supply installers with the specifications they develop. As a result, engineers working in the MEP field must understand a broad range of disciplines, including dynamics & mechanics of fluids, thermodynamics, heat transfer, chemistry, electricity, and computers. etc..

Awareness on Drugs

26-06-2021

The International Day against Drug Abuse and Illicit Trafficking, or World Drug Day, takes place on June 26 each year. Its primary goal is to raise awareness about drug addiction and the issues it can create. This international cause is led by the U.N. in an effort to educate people about drug use and find a solution for this global problem.

Drug addiction treatment is a valuable resource that helps people with substance use disorders make a safe and lifelong recovery. While treatment can help, World Drug Day seeks to prevent and manage drug use before addiction and other problems ever begin.

In the view of this College administration conducted awareness on Drugs to students'. The resource persons I. Hussain, Inspector & Sri M. Sattibabu, Additional of Police, Special Enforcement Bureau, Vijayawada, East station.

Drug and alcohol abuse are important problems that affect College-age youth at earlier ages than in the past. Young people frequently begin to experiment with alcohol, tobacco, and other drugs by the time students are in high school, rates of substance use are remarkably high. According to national survey data, about one in three twelfth graders reports being in the past thirty days; furthermore, almost half of college students report ever using marijuana and more than one-fourth report using marijuana in the past thirty days. Marijuana is the most commonly used illicit drug among college students.

Traditionally, drug and alcohol abuse education has involved the dissemination

PRINCIPAL

ENGINEERING & TECHNOLOGY

of information on drug abuse and the negative health, social, and legal consequences of abuse. Contemporary approaches include social resistance and competence-enhancement programs, which focus less on didactic instruction and more on interactive-skills training techniques. Contemporary programs are typically categorized into one of three types: (1) *universal* programs focus on the general population, such as all students in a particular school; (2) *selective* programs target high-risk groups, such as poor college achievers; and (3) *indicated* programs are designed for youth already experimenting with drugs or engaging in other high-risk behaviors.

Director Father Dr.A.Francis Xavier S.J, and Principal Dr.O.Mahesh also delivered valuable information to students. The program was coordinated by Dr.V.V.Prabhakar rao and Supported by Dr.M.Geetha Rani & Mr.K.TejaSwarup of Mechanical Engineering Department.

AI-Driven Companies Outpacing Traditional Firms

- Understanding the revolutionary impact that Artificial Intelligence (AI) has on operations, strategy and competition is a must for every business leader.
- It becomes even more important, especially if you're planning to launch a digital start-up, or looking to revamp your traditional business.
- The age of AI is being guided by the emergence of new kinds of firms, where the real value comes from algorithms, rather than traditional business processes.
- Today, AI sets the prices on Amazon, recommends songs on Spotify, matches buyers and sellers on indigo's marketplace, and qualifies borrowers for an Ant Financial loan.

Leading organizations expect to double the number of Artificial Intelligence (AI) projects in place within the next year, and over 40% of them plan to actually deploy AI solutions by the end of 2020 - Gartner
