INDUSTRIAL STUDY VISIT TO HINDUSTAN COCA COLA BEVERAGES LIMITED, ATMAKUR

Title: Industrial Study Visit to Hindustan Coca Cola Beverages Limited, Atmakur

Date(s): 30-10-2019

Resource Person: Mr. Pallam Raju, Quality Control Manager, HCCB Ltd.

Venue: Coca-Cola Plant, Atmakur.

Participants: II/III Students of MBA

Description about the Visit:

Industrial visit has its own importance in a career of a student who is pursuing professional courses like MBA. Industrial visit helps to combine theoretical knowledge with practical knowledge. The objective this industrial visit is to provide students an insight regarding internal working of companies. It provided them with an opportunity to learn practically through interaction, working methods and employment practices. It gave them an exposure to current work practices.

II year MBA students along with three faculties from department of Master of Business Administration reached the company around 9.30 AM by college bus. Mr. Pallam Raju who is working as Quality control manager accompanied the team throughout the visit. They have shown a video which explains the whole coca-cola company working process. After that they took the students to visit the entire factory division wise. The whole visit gave a wonderful experience to the students in learning practical side of the industrial management.

Dear Sir,

Sub: Request permission for MBA Students Industrial Study Visit to HCCBPL-Reg.

At the outset, we would like to express our heartfelt thanks to you once again for your continuous support to our MBA Programme in the past 6 years by facilitating project work permissions and facilitating plant visit.

The ongoing batch of MBA III Semester students is very much interested in visiting your illustrious industrial organization HCCBPL, to acquire practical skills and knowledge. Hence we request you to make it convenient to allow our students on 30th October, 2019 at 10:30 AM.

We assure you that our visit will not cause any inconvenience or disturb your routine functions and we will strictly abide by your safety, discipline and other norms. The student's team consisting of 54 will be lead by three faculty members. We will arrange our own transportation (bus) for this visit. I request you to provide necessary assistance.

Thanking you

(Approved by AICTE, New Delhi & Affiliated to JNTU, Kakinada)
Vijayawada – 520 008
DEPARTMENT OF BUSINESS ADMINISTRATION

K.C.P. Sugar and Industries Corporation Limited, Vuyyuru, Krishna District, Andhra Pradesh

Title: K.C.P. Sugar and Industries Corporation Limited, Vuyyuru, Krishna District, AP - To provides students an insight regarding internal working of companies.

Date(s): 24th February, 2020- 09.00AM – 12PM

Venue: K.C.P. Sugar and Industries Corporation Limited, Vuyyuru, Krishna District, AP

Participant's:

44 Students of II MBA and 2 Faculties from Department of Master of Business Administration, ALIET.

Description about the Visit:

Industrial visit has its own importance in a career of a student who is pursuing professional courses like MBA. Industrial visit helps to combine theoretical knowledge with practical knowledge. The objective this industrial visit is to provide students an insight regarding internal working of companies. It provided them with an opportunity to learn practically through interaction, working methods and employment practices. It gave them an exposure to current work practices.

44 second year students along with two faculties from department of Master of Business Administration reached the company around 9.00 AM by college bus. Two supervisors from the production department received the batch and accompanied them throughout the visit. The entire visit gave a wonderful experience to the students in learning practical side of the industrial management.

Report Submitted by: Mrs. V. Nagalakshmi, Mr. Rajesh Pasala

Industrial Study Visit Permission Letter From Andhra Loyola Institute of Engg & Tech,

1 message

Gandhi Kodavati <gandhi.po@gmail.com> Thu, Feb 13, 2020 at 3:10 PM
To: hrprajesh@gmail.com

Dear Sir,

You are permitted Industrial visit on 24-02-2020 provided your staff is going to take care of students.

A faculty is must for every 20 students in number. Company is not responsible/liable for any incident or accident or any sort of injuries inside the factory during your visit.

Kindly ask your faculty/students to cooperate with our personnel for a safe and secure industrial visit.

Regards

Das Yalamanchili

Title: Industrial Visit

Date(s): IV B.Tech students of Civil Engineering
Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada on 05.03.2020

Industry Visited: Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada

Participant's:

CIVIL IV YEAR STUDENTS. Student's team consist of 39 **Students** lead by Three Faculty Members.

Description about the Visit:

CIVIL IV YEAR STUDENTS visited Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada as part their academic activity. Real time field visit will enhance the student's exposure to production processes.

The Visit helped the students to know about Sewage treatment. The process involves removing contaminants from municipal wastewater. Sewage water can travel towards treatment plants via piping and in a flow aided by gravity and pumps. IV B.Tech students were taken to Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada for practical exposure on Treatment process of Waste water and testing of treated water samples in Laboratory

Industrial Visit Report

Title: Industrial Visit

Date(s): III B.Tech students of Civil Engineering
Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada on 06.03.2020

Industry Visited: Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada

Participant's:

CIVIL III YEAR STUDENTS. Student's team consist of 60 **Students** lead by Three Faculty Members.

Description about the Visit:

CIVIL III YEAR STUDENTS visited Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada as part their academic activity. Real time field visit will enhance the student's exposure to production processes.

The Visit helped the students to know about Sewage treatment. The process involves removing contaminants from municipal wastewater. Sewage water can travel towards treatment plants via piping and in a flow aided by gravity and pumps. IV B.Tech students were taken to Sewage Treatment Plant, Ajithsingh Nagar, Vijayawada for practical exposure on Treatment process of Waste water and testing of treated water samples in Laboratory

Faculty accompanied: Mr. N. Abhilash, Mr. Ch. Suresh and V.Swathy Padmaja

Industrial Visit Report

Title: Industrial Visit

Date(s): 07thMarch , 2020

Industry Visited: Prakasam Barrage & **Ultra Tech Cements Private Limited**, Vaddeswaram

Participant's:

II Year II Semester 54 students and Three faculty members

Description about the Visit:

- As part of the practical exposure, all the Second Year Civil Engineering students were taken to Prakasam Barrage, Mr. Gopinath, AE had explained about History of the Barrage, the repair works going on and how the age of the Barrage is increased with additional reinforcement provided in near Tail Pond and approach area.

→ II/IV B.Tech Civil Engineering students were shown how Ready MIX Concrete is prepared and transported and placed during the construction at **Ultra Tech Cements Private Limited**, Vaddeswaram. Its Manager, Mr. SWAROOP, had explained how a Concrete Mix is calculated and prepared. Also taught them different types of admixtures and plasticizers used in RMC.

Title: Industrial Visit

Date(s): 28th Feb 2020, 10.00AM – 04.00PM

Industry: ELECTRIC LOCO SHED,Vijayawada

Participant's:

IV Year I Semester Electrical & Electronics Engineering 42 students and three faculty members

Description about the guest lecture:

The purpose of our industrial visit is to get a practical view about windings i.e., in motors. Throughout our visit we saw the manufacturing of motors and its inner parts, mainly how the windings are wounded in a motor.

Railway electric traction describes the various types of locomotive and multiple units that are used on electrification systems around the world. It uses DC series motor for the engine and in traction it uses three phase induction motor for regenerative braking purpose.

Sir/Madam,

Sub: Request to sanction permission for Industrial Visit - reg.,

ALIET is one of the premier institutes in Vijayawada, offering quality education to its students in the field of Engineering and Technology. The department of ECE is in the forefront by conducting various workshops, guest lectures, Industrial visits, seminars in collaboration with industry and academia to improve the overall standards of the institute. Industrial visits are organised to understand the methodologies and processes adopted by the industry and to bridge the gap between industry and institute.

In this connection, the department of ECE is planning to organise an Industrial visit for III ECE students from 12-07-19 to ——— (1) day(s).

Hence, I request you to grant permission for the visit and confirm the dates.

Thanking you,

Yours faithfully

M. Ramakrishna,
Assoc. Prof & Head,
Department of ECE.

Sir,

Sub: Requesting for permission to visit your esteemed Organization – Industrial visit for IV/IV ECE B.Tech students – Reg.

The ALIET(part of Andhra Loyola college, Vijayawada) is established in 2008. The institute is supporting the value based education by offering B.Tech(ECE, EEE, CSE, IT, CIVIL, MECH) and MBA programs.We are requesting you to grant permission for IV B.Tech ECE students to visit your esteemed organization.

As a part of the curriculum industrial visit for IV year students is mandatory, so as provide with them the real insight of working procedure of an esteemed organization such as yours and to fulfill the curriculum demand, we request you the industrial visit. Kindly accord permission to visit your esteemed organization for a team of **130 students along with 3 staff members** as per your convenience as on any dates tentatively in the month of **July, 2019.**

Thanking You,

Regards

Reconfigurable Antenna using Micromechanical Actuation Switches for K and Ku-Band Applications

Sathuluri Mallikharjuna Rao, G. Sasikala

Abstract- In this paper, we have proposed a reconfigurable antenna using micro mechanical actuation switches for K and Ku-band applications. Overall two identical cantilever micro mechanical switches (S_1 & S_2) are used to design reconfigurable patch antenna. The switches are working by electrostatic actuation mechanism. With the switches, overall the antenna is offering four resonant frequencies based on the switches ON/OFF condition. The Micro mechanical switches are offering an isolation loss of -18.5dB and an insertion loss of -1dB. The switch requires a DC actuation voltages of 6V. The Proposed reconfigurable antenna is resonating at four different frequencies based on the different switching conditions of RF MEMS switches. If S_1 & S_2 both are ON the antenna is resonating at 16.9GHZ, if S_1 -ON & S_2-OFF the antenna is resonating at 47.3GHZ & 59.1GHZ, if S_1 -OFF & S_2-ON the antenna is resonating at 28.4GHZ, if S_1 -OFF & S_2-OFF the antenna is resonating at 27.9GHZ

Index Terms- Patch antenna, re-configurability, RF MEMS switch, PIN diode, FET, Polarization, bandwidth, gain, directivity.

I INTRODUCTION

The latest communication applications require high speed data transmission with low power consumption, this is the significant research problem. Massive MIMO like systems require array of antennas but it eventually suffers with signal interference problems. To overcome these type of problems, we can use reconfigurable microstrip patch antennas other than the array of antennas. The re-configurability in patch antennas can be achieved with structure like E-shape, but the efficiency is not up to the level, so this approach is not preferable[1-4].

The alternative method to get re-configurability in microstrip patch antenna is by placing switches like PiN diodes or FET transistors and RF MEMS switches. In this RF MEMS switches offering best performance compared with PiN diode and FET transistors in terms of power consumption and offers better linearity[5-9].

Achieving the high isolation, low insertion and low pull-in voltage are the significant research challenges in micromechanical switches.

In this paper, we have designed and verified the performance of reconfigurable antenna using capacitive RF MEMS switches. The antenna is preferable in k-band and ka-band applications.

Revised Manuscript Received on December 15, 2019.

Sathuluri Mallikharjuna Rao, Research Scholar, Department of ECE, Vel Tech University, & Assistant Professor, Dept. of ECE, Andhra Loyola Institute of Engineering and Technology, Andhra Pradesh, India. Email.: smr.aliet@gmail.com.

Dr.G Sasikala, Professor, Department of ECE, Vel Tech University, 400 feet outer ring road, Avadi, Chennai-600062, Tamilnadu, India. Email.: gsasikala@veltech.edu.in.

The eventual reconfigurable microstrip antenna design is done in three steps, as an initial task we have designed an RF MEMS switch suitable in K-band and Ku-band frequency range, in the second level a microstrip patch antenna is designed and which is suitable to place RF MEMS switches, and in the final step the RF MEMS switches are placed in the proposed microstrip antenna structure as shown in figure 9.

II MICROMECHANICAL SWITCH

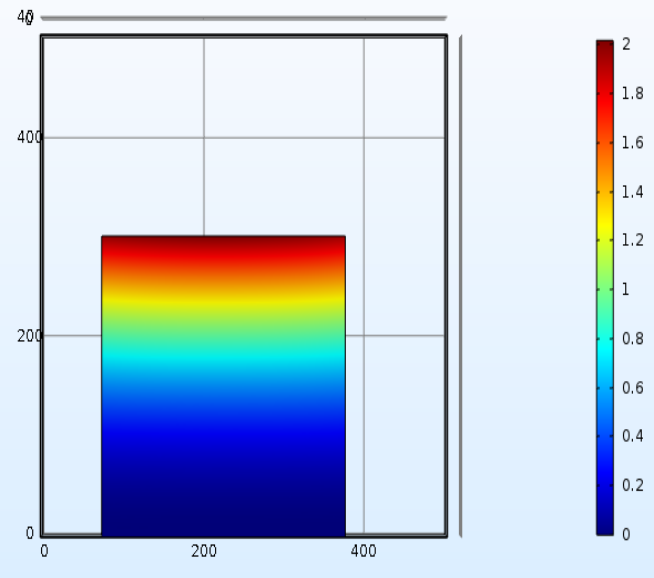

Figure 1: Micromechanical Cantilever shunt capacitve switch electromechanical analysis

The reconfigurable micro strip patch antenna design involves placing of two identical RF MEMS switches. An electrostatic shunt capacitive RF MEMS switches are used. CPW transmission line is used for switch design with dimension 100 µm x100 µm x100 µm.

The working principle of micro mechanical switch is, when the structure is in upstate(OFF), the input radio frequency signal is allowed to the output port with low insertion losses, and if the structure is in downstate(ON) the switch offers a capacitance in the range of pF and the input radio frequency signal is completely isolates and the output is zero. The electrostatic actuation model cantilever based shunt capacitive RF MEMS switch is shown in figure 1.

Abstract:
In this paper we have design an internet of things system for pure water aquaculture applications. Initially the IoT system routing topology is analyzed using network simulator to improve the quality of service by extracting the performance indices parameters. Eventually the IoT system is implemented practically using sensor nodes, internet gateways and application interfaces. Overall the system can monitor the parameters like temperature, PH, dissolved oxygen, light and nitrite which are primarily required in aquaculture application. The present aquaculture industry demands these type of water quality monitoring system, which helps the farmers to take smart decisions to increase the yield. The application of the aquaculture system is developed using infrastructure as a service cloud computing. The network topology routing analysis is done on number of nodes required over 5km x 5km area for high quality of service.

Keywords: *IoT, WSN, network routing, quality of service, sensors, aquaculture, network simulator.*

I. INTRODUCTION

The internet of things is unique technology which is emerged in to different fields like agriculture, medical, military, and industry[1-3]. Among these agriculture IoT is the potential research area which is attracting more researchers[4-5]. And aquaculture is the one of the most sensitive domain in agriculture, so by adopting IoT technology in aquaculture we can improve the shrimps and fisheries yield, it is the major motivation of many researches [6].

Temperature, PH, dissolved oxygen, salinity, sulphide, biological oxygen demand(BOD),chemical oxygen demand (COD), nitrate, nitrite, ratio of phyto and zooplankton are the priory parameters in aquaculture[7]. Periodical monitoring of these parameters using IoT system help the farmers to take smart decisions which helps to improve the yield. In IoT offering the good quality of the service with high security is one of the major research challenge. Prior to the implementation doing network level analysis helps to improve the quality of service[8]. By using proper user login credentials we can provide high security to the IoT system[9].

In IoT system design communication technology plays an important role. The communication technology may be wired or wireless, the wired communication technologies like RS485,HART, ProfiBus are generally used in IoT for transducer interface. The wireless communication technologies like Wi-Fi, Zigbee, 6LoWPAN are used in IoT for data uploading into the cloud (bigdata). From any communication technology the novel and sturdy IoT system design expecting high transmission rate, high coverage, low latency, large number of connections, high reliability, high security. Markov discrete time M/M/1 queuing modeling is preferable modeling the parameter like energy consumption, delay, throughput, path loss, wireless link channel, non-isotropic transmission.

The paper is organized as follows: in section II, we investigate the related work on aquaculture IoT systems, section III describes the network level

Abstract
This overview discuss about the distinctive MIMO Antennas for wireless communications. In the current age scenario MIMO Antennas assume a significant job in the field of day to day communications. In the most recent decade there are many examination works proposed in the region of MIMO antennas. In this survey we speak about distinctive MIMO Antenna's and its parameters. In this study paper additionally we will discuss about the distinctive MIMO antennas with various parasitic components and its impact of decrease the MIMO antenna issue, for example, mutual coupling and cross polarization between antenna elements. For the investigation of mutual coupling likewise we will also discuss on the surface currents, in this study shows the surface current investigation of various past work. ECC and proficiency of the MIMO antenna likewise assume crucial job to dissect the presentation of the MIMO antenna. The greater part of the MIMO antennas experience the negative effects of Mutual Coupling (MC), low level of radiation gain, low data handling capacity due to limited bandwidth and Voltage Standing Wave Ratio (VSWR). These are the serious issue of a MIMO antenna which are been focused in this review paper.

Keywords— ECC, Efficiency, Mutual Coupling, Impedance Matching and Surface current analysis

INTRODUCTION:

As a enhancement to the conventional communications like cellular and wired communication systems, different remote access technologies have been grown quickly in the previous years. With the ascent of Internet of Things and Smart Home concepts, the communications systems which require high data transfer rates likely 1Gb/s has pulled in to the innovators consideration. It has been affirmed that communication systems for UWB-MIMO application consolidating UWB technique with MIMO technology can accomplish this objective. As we known, the principle benefits of any communication system for UWB is its high working frequency band allocation of 3.1 to 10.6GHz which can be used to incorporate high information data transfer rate [1], and its incredible ability in handling the multipath fading. In this way, by integrating the technologies of UWB and MIMO, the multipath issue can be treated in a effective way at the same time can increase the ability of the channel to meet the high data rate transfer requirements of the UWB systems without any need of additional spectrum for the proposed application, with these enhancements it will be very easy to attain the high information pace of 1Gb/s and it can be successfully accomplished in the UWB-MIMO systems, antenna plays a crucial part in any communication system and so as in the proposed UWB-MIMO systems. Its characteristics straight forwardly influences the efficiency of the UWB-MIMO systems. Thus, the antenna design for a UWB-MIMO system has pulled in broad considerations and investigates from numerous researchers [2]–[7].

In this study paper primary target under study is design of a antenna element for MIMO system. Different available solutions for the key issues like low gain, low bandwidth and mutual coupling were also discussed. This discussion provides a brief overview about various techniques to enhance the performance of the MIMO antenna system in terms of improvement of data transmission within the limited spectrum available, techniques to reduce the coupling in between the MIMO antenna elements and low radiation gain of the MIMO antennas.

LITERATURE SURVEY

In [1] S. Rajkumar has proposed a MIMO antenna with four elements arranged in a 2×2 matrix structure which are having UWB characteristics as shown in Fig.1.

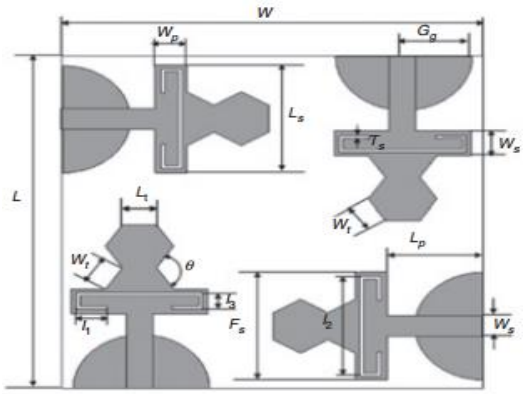

Fig. 1 Geometry of antenna

The patch is a hybrid one which is a combination of a hexagon, trapezoid and a slotted rectangle. These three are aligned in series and are fed with a microstrip line. All the four elements are aligned in othogonal manner to each other so as to yield great seclusion and the need for a extra decoupling structure has been overthrown. The slot in the rectangular component of the patch helps in developing a band notch characteristic in the antenna. The antenna has a smaller size of 40 × 40 × 1.6 mm3 and displays stable omni-directional radiation. It shows a satisfactory impedance transfer speed in the range 2.4–10.6 GHz with a return loss of better than −20 dB over the UWB extend shown in fig.2. The antenna is an appropriate candidate for large MIMO antennas.

SUMMER INTERNSHIPS

Internship Completion Certificate

Date: 15/8/2020

To whomsoever it may concern,

We are glad to inform you that "**Gunisetty divija**" has been pursuing a **6 weeks** Remote internship on "**Python Programming**" starting from **6/10/2020**. We hereby confirm that **he/she** has successfully completed the mentioned internship as part of GOAL STREET INTERNSHIPS.

During **his/her** Internship, **he/she** had worked under well-rounded mentors from the Industry for training in the particular discipline. Additionally, "**Gunisetty divija**" has also played a crucial role in working on a live "Capstone" project alongside fellow teammates to exhibit exemplary coordination and skill, and at the same time, was able to apply valuable knowledge and experience in facilitating the completion of the Project. The project, namely, "**Market analysis of superstore with time series**" stands testimony to the skills and knowledge obtained as part of their journey here at GOALSTREET.

Internships have been a great opportunity for any student to learn experience and evolve as a better professional in this ever-changing engineering stream. We, on behalf of ThinAir Incubation & Acceleration Solutions and GoalStreet Team, congratulate and wish you a bright career.

All the Best

Industrial Visit Report

Title: Industrial Visit

Date(s): 07thMarch , 2020

Industry Visited: Prakasam Barrage & **Ultra Tech Cements Private Limited**, Vaddeswaram

Participant's:

II Year II Semester 54 students and Three faculty members

Description about the Visit:

- As part of the practical exposure, all the Second Year Civil Engineering students were taken to Prakasam Barrage, Mr. Gopinath, AE had explained about History of the Barrage, the repair works going on and how the age of the Barrage is increased with additional reinforcement provided in near Tail Pond and approach area.

→ II/IV B.Tech Civil Engineering students were shown how Ready MIX Concrete is prepared and transported and placed during the construction at **Ultra Tech Cements Private Limited**, Vaddeswaram. Its Manager, Mr. SWAROOP, had explained how a Concrete Mix is calculated and prepared. Also taught them different types of admixtures and plasticizers used in RMC.

MEMORANDUM OF UNDERSTANDING BETWEEN

HYDERABAD INSTITUTE OF ELECTRICAL ENGINEERS (HIEE)

AND

ANDHRA LOYOLA INSTITUTE OF ENGINEERING AND TECHNOLOGY

This Memorandum of Understanding (MOU) establishes a type of partnership between **HIEE** and **ALIET**.

I. MISSION:

Hyderabad Institute of Electrical Engineers (HIEE) an ISO certified Pioneer Finishing School in India for Electrical designing courses, located in Hyderabad. Designed with the intent of bridging the gap between the academics & industry from the year 2010 onwards and trained more than 6000 students as on date.

ALIET ensures setting high standards in imparting professional education by employing proven new education methodologies along with the measurable techniques which would help both the faculty & students to make learning a great experience to help them embrace the opportunity suiting them.

The Memorandum of Understanding to promote PLACEMENTS, INTERNSHIPS, WORKSHOP's AND PROJECTS. Accordingly, HIEE and ALIET operating under this MOU agree as follows:

II. PURPOSE AND SCOPE

HIEE and ALIET describe the intended results or effects that the organizations hope to achieve, and the area(s) that the specific activities will cover.

Benefits to ALIET:

- Job oriented training
- Practical Oriented sessions
- Real time projects
- Industry visits
- Certificates
- Placements
- Workshops and guest lectures

WHO IS THE TARGET?

EEE students of

- 2nd year students for workshops Industry visits
- 3rd year students for Internship programs and mini projects
- 4th year Final Semester students for Job oriented training with Placements.

Note: All the courses are provided with Certificates.

III. TERMS OF UNDERSTANDING

The term of this MOU is for a period of 1 year1 with effect from 23/07/2021. This MOU can be extended upon written mutual agreement. It shall be reviewed annually to ensure that it is fulfilling its purpose and to make any necessary revisions.

Either organization may terminate this MOU upon thirty (30) days written notice without penalties or liabilities.

Authorization

The signing of this MOU is not a formal undertaking. It implies that the signatories will strive to reach, to the best of their ability, the objectives stated in the MOU.

On behalf of the organization I represent, I wish to sign this MOU and contribute to its further development.

The Memorandum of Understanding to promote PLACEMENTS, INTERNSHIPS, WORKSHOP's AND PROJECTS. Accordingly, HIEE and ALIET operating under this MOU agree as follows:

II. PURPOSE AND SCOPE

HIEE and ALIET describe the intended results or effects that the organizations hope to achieve, and the area(s) that the specific activities will cover.

Benefits to ALIET:

- Job oriented training
- Practical Oriented sessions
- Real time projects
- Industry visits
- Certificates
- Placements
- Workshops and guest lectures

WHO IS THE TARGET?

EEE students of

- 2nd year students for workshops Industry visits
- 3rd year students for Internship programs and mini projects
- 4th year Final Semester students for Job oriented training with Placements.

Note: All the courses are provided with Certificates.

III. TERMS OF UNDERSTANDING

The term of this MOU is for a period of 1 year1 with effect from 23/07/2021. This MOU can be extended upon written mutual agreement. It shall be reviewed annually to ensure that it is fulfilling its purpose and to make any necessary revisions.

Either organization may terminate this MOU upon thirty (30) days written notice without penalties or liabilities.

Authorization

The signing of this MOU is not a formal undertaking. It implies that the signatories will strive to reach, to the best of their ability, the objectives stated in the MOU.

On behalf of the organization I represent, I wish to sign this MOU and contribute to its further development.

MEMORANDUM OF UNDERSTANDING BETWEEN

HYDERABAD INSTITUTE OF ELECTRICAL ENGINEERS (HIEE)

AND

ANDHRA LOYOLA INSTITUTE OF ENGINEERING AND TECHNOLOGY

This Memorandum of Understanding (MOU) establishes a type of partnership between **HIEE** and **ALIET**.

I. MISSION:

Hyderabad Institute of Electrical Engineers (HIEE) an ISO certified Pioneer Finishing School in India for Electrical designing courses, located in Hyderabad. Designed with the intent of bridging the gap between the academics & industry from the year 2010 onwards and trained more than 6000 students as on date.

ALIET ensures setting high standards in imparting professional education by employing proven new education methodologies along with the measurable techniques which would help both the faculty & students to make learning a great experience to help them embrace the opportunity suiting them.

The Memorandum of Understanding to promote PLACEMENTS, INTERNSHIPS, WORKSHOP's AND PROJECTS. Accordingly, HIEE and ALIET operating under this MOU agree as follows:

II. PURPOSE AND SCOPE

HIEE and ALIET describe the intended results or effects that the organizations hope to achieve, and the area(s) that the specific activities will cover.

Benefits to ALIET:

TO WHOM IT MAY CONCERN

This is to certify that **Mr. Venkata Gopi Sai Teja Thungala** from **Andhra Loyola Institute of Engineering & Technology** has undergone and completed his Summer Training & Internship Program in **"Online Internship in VLSI Design"** from July 2020 to August 2020.

During this period, exposure has been given on various technical activities around "VLSI" technology at Tevatron Technologies Pvt. Ltd. He has successfully done a project on **"One Cross Three Router".**

We found him extremely inquisitive & hardworking. He was very much interested to learn the function of our core division & also willing to put his extra effort to get into the depth of the subject in order to understand it better. His overall performance has been rated very Good & we would like to wish him for future endeavors.
